***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, 18-26 and 28, drawn to a market research and merchandise information evaluation system comprising a consumer terminal that functions as a reply apparatus, classified in class 705, subclass 10.
- II. Claims 16-17, drawn to a market research system comprising a market research ordering section that places an order for market research, classified in class 705, subclass 10.
- III. Claims 27 and 29-31, drawn to an e-commerce system comprising a reply signal calculating section, classified in class 705, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a consumer terminal that functions as a reply apparatus. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a consumer terminal that functions as a reply apparatus. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III, restriction for examination purposes as indicated is proper.

Inventions III and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a reply signal calculating section. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Group II, restriction for examination purposes as indicated is proper.
